

TOILET ETIQUETTE

Please remember that only toilet paper, excrement (poo) and urine (pee) can be flushed. Anything else will clog your toilet and or the sewage plumbing system. Pipes can't handle things like wipes, facial tissues, diapers, cotton balls, tampons, dental floss, paper towels and even hair (who knew?) Many of these items become stringy and bind together to block pipes.

Also please do not use any in tank cleaning pucks. The chlorine disintegrates parts in the toilet which can lead to leaking / flooding. Damages caused by use of cleaning pucks will be the responsibility of the tenant.
